Joining Battery with BMU to Network Instructions

These instructions assume that the BMU has been installed on the battery and is properly set. It also assumes that a network has been started and set up on the charger.

1   Confirm that the Charger has been set to BMU or Dual "Source". Press ESC to get to main menu.

2   Using up/down arrows, scroll to "Login" and press OK.

3   Press OK, and using up/down and left/right arrows enter 2451, then press OK.

4   Using up/down arrows, scroll to "Service" and press OK.

5   Scroll to "Charging Param" and press OK>

6   "Source should be set to either BMU or Dual. If not scroll to "Source", press OK and use up/down arrows to select BMU or Dual, then press OK.

7   Once the charger is preset to BMU or Dual source, press ESC to return to the Service menu, and scroll to the "Display" menu and press OK.

8   Scroll to "Backlight" and press OK.

9   Set Backlight to 60 using up/down arrows and press OK. Press escape to return to the Service Menu .

10   Scroll to "Join Enable", and press OK.

11   Within the next minute, connect the battery with the BMU installed to the charger. The charger should start, then stop briefly before restarting.

12   Press ESC until the charger displays the charging display. Verify that the display readout includes the BMU ID number.
